

Magadi 1100

Microfiltration Water Purifier for Food Services

Magadi 1100 is a high-flow commercial water purifier designed for the food service industry, especially suitable for kitchens 80-100sqm. It can help remove sediment and chlorine, improve the taste and odor of food or beverages, keep equipment running smoothly, and prolong the service life of water-using equipment. Plus, it can be connected to a UV sterilizer, or connected to an ice maker after descaling.

19 L/min
Flow Rate

No Electricity
Required

reddot winner 2020

Fresh and Clean Water

Filters out particles larger than 5 μm , and removes chlorine, chloroform, odor taste, and heavy metal chemicals effectively.

Water Distribution On Demand

Connect with other water treatment equipment or kitchen appliances to meet your particular needs.

Take Water Sample At Ease

Regular testing of water is required to ensure that quality standards are met. Easily take a sample with the water sampling port.

High Flow Rate

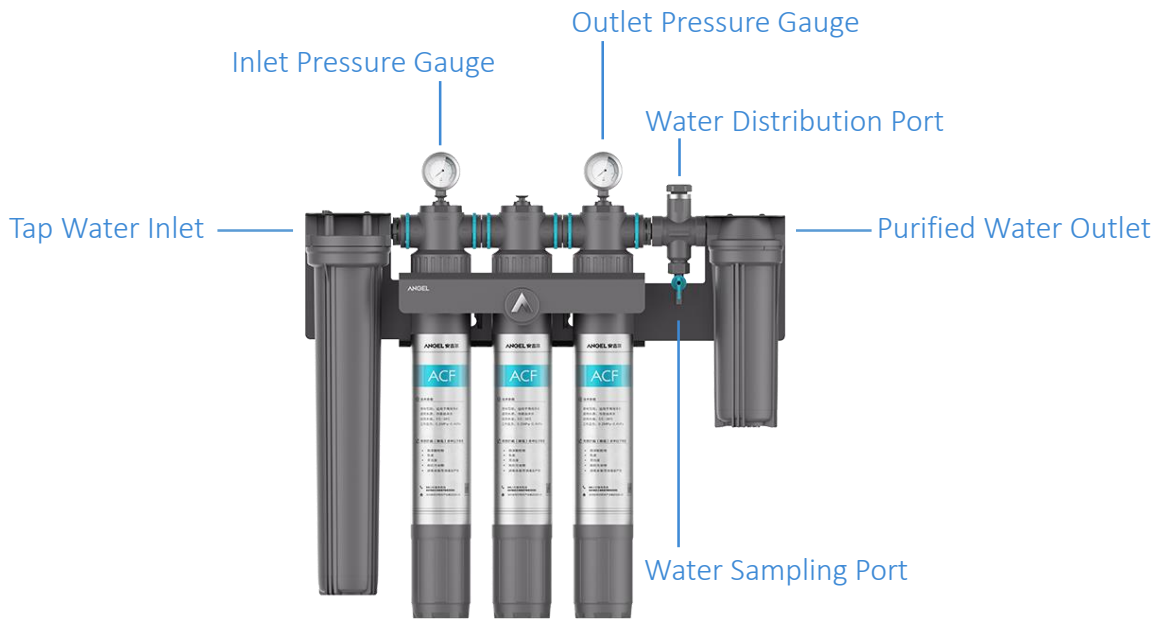

Water filters are installed in parallel for purified water supply, functions at a flow rate of up to 19 L/min.

Easy Filter Replacement

Monitor the filter status at any time through its pressure gauges. Twist-to-lock design for easy filter replacement.

Multiple Installation Methods

Supports various types of walls, such as foam wall, hollow brick wall, steel plate wall, and steel structure wall.

Specifications

Model	J2820-CS1100
Flow Rate	19 L/min
Filtration Precision	5 Micron
Inlet Water Temperature	5-38°C
Inlet Water Pressure	200-400 kPa
Filter & Service Life*	PP Filter, 3 months
	3 x ACF Filter, 12 months
	Scale inhibitor filter, 12 months
Operating Temperature	4-40°C
Dimensions (mm)	W 710 x D 151 x H 697
Weight	14.5 Kg
QTY/ Container	20 GP: 526 pcs 40 GP: 1117 pcs 40 HQ: 1273 pcs

* Service life will vary according to flow rate, influent line pressure and local water conditions.
